SEAMED-CLOSURE CANS ■

- Article:** Seamed-closure cans out of tinfoil
- Sealing:**
- welded side seam
 - bottom sealed
- Closures:**
- easy-open end
 - seamed-top end

Our seamed-closure cans have a variety of uses. They are suitable for chemical-technical goods as well as for foodstuffs. Especially for cheese in brine or for cooking oils the seamed-closure cans are ideal.

Seamed-lid cans are sealed in the production plant either with easy-open ends, or in the case of large containers, with seamed top ends. For closing the cans, the filler folds up the bottom or the top end after filling.

Nominal capacity liter	Ø mm	Height mm	Closures		Design type approval
