OPTICAN ■

- Article:** Lever lid pails out of tinplate
- Sealing:**
 - welded side seam
 - bottom sealed
- Inside lacquer coating:**
 - for solvent-based contents **without** inside lacquer coating
 - for water-based contents (ACL) bottom, body, ring **with** inside lacquer coating lid inside film laminated
- Carrying device:**
 - wire bail, integrated in the levering

Lever lid pails are primarily used for paints, varnishes and wood preservatives. The pail is finished to meet your specific requirements, e.g. inside lacquer coating and high quality printing.

OptiCan is a new generation of 2.0 and 2.5 liter pails. A patented container which eliminates the need for ball ears on the sides, leaving 14 % more room on the shelf. The wire handle is directly fixed in the ring on the top of the pail and so the handle interferes neither with the filling nor with the labeling.

Nominal capacity liter	Ø mm	Height mm	Contents		Design type approval		
			solvent-based	water-based	without	RID/ADR	UN
2	140	162	■	■	■		
2,5	140	188	■	■	■
